Will your cholesterol medicine help your arteries?

Join with us to discover better treatment options.

Researchers at the National Institutes of Health (NIH) Clinical Center in Bethesda, Maryland, are looking for volunteers to participate in a 36-month study. The study is investigating how the amount of plaque in your arteries can be reduced by statin medication. There are no costs for study-related tests, procedures or medication.

You may be eligible if you are:

- male between 45-75 years of age or
- female between 50-75 years of age
- willing to travel to the NIH for follow-up visits
- on or eligible for statin therapy
- able to undergo a CT scan

You may NOT be eligible if you have:

- kidney failure
